RANELAGH SCHOOL

Ranelagh School worked with Pinnacle to fit out their science laboratories on a rolling programme over the last 3 years. Ranelagh's requirements for the science laboratory were a functional space that caters for large pupil numbers and plenty of storage.

The science laboratory project includes durable materials and a linear layout to create a clean, functional laboratory that students can enjoy. The composite stone worktops throughout the room are very hard wearing and chemical-resistant, essential for standing up to the heavy usage in school laboratories. We always provide high-quality fittings in laboratories, ensuring that they are reliable, durable and

attractively designed. With all students facing forward, there is an easy-to-view teacher's demonstration area where students are able to watch experiments. We also designed the fitted furniture and storage around the perimeter of the room, providing plenty of workspace and a clean white and grey

colour scheme with attractive blue highlights. We provided glass sliding door wall units to house Ranelagh's interesting collection of skulls and bones!

We fitted out the lab with the popular cantilevered Form stools which have a 25 year structural guarantee and a sculpted

seat for comfort. These stylish wooden stools can hang from worktops to allow for faster and easier cleaning.

SPECIFICATION

- Science laboratory refurbishment

LOCATION

- Bracknell, Berkshire

SCOPE OF WORKS

- Composite stone work surfaces
- Curved island units
- Blue accent edging on storage
- Teacher's demo bench
