RYVERS SCHOOL

Ryvers School requested that Pinnacle provide fitted storage solutions for classrooms, student storage and a training room. Pinnacle rose to the task and came up with the ideal solution to improve the school's storage and create efficient use of the space.

The classroom was decorated in white which gave it a light, spacious atmosphere and a streamlined white TeacherWall was installed which blended in well with its surroundings. This was a six module TeacherWall in a matt finish with sliding whiteboard doors, tray storage and cupboards with shelving. The same 6m wide design was then installed in three other classrooms.

These TeacherWalls were large and provided a lot of storage for the teachers as they had a mixture of shelving and tray storage to accommodate all types of teaching materials. However, the subtle matt white finish ensured they didn't visually encroach on classroom space.

CASE
STUDY

SPECIFICATION

- Installation of TeacherWalls

LOCATION

- Slough, Berkshire

SCOPE OF WORKS

- LockerWalls
- TeacherWalls

The Pinnacle team also installed a 4.2m wide TeacherWall with one full height cupboard and four low level cupboards in a teacher training room. Two of the units had gratnell trays with sliding whiteboard doors above to provide a writing surface for training sessions. This TeacherWall was in a smart grey finish with accent colours to provide interest and variety

to the room. To provide a locker solution for the students, the team installed two runs of back-to-back LockerWalls in the corridor consisting of 176 lockers with number discs. The base colour of the LockerWall was an understated grey with random doors highlighted in dark blue, pale blue and lime, which created a stunning design to give wow factor in the corridor.
