RAINHAM MARK GRAMMAR SCHOOL

Rainham Mark Grammar School approached Pinnacle Furniture as they needed a refurbishment of their sixth form area to create a common room for the sixth form students to study and socialise.

The project involved a lot of refurbishment and building work and Rainham Mark also needed support designing the layout and furniture that best worked for the space. The project was carried out in Summer 2014 and the photos below show the sixth formers settled in and using their new facility! The project involved substantial refurbishment works including removing some partitions, installation new

partitioning (mostly glass for ease of visibility), new ceilings using acoustic ceiling tiles, wood finish flooring, lighting, doors, blinds and furniture throughout. The furniture needed to be re-configurable to facilitate individual and group study.

The Byte tables can fit together in groups or be used individually and the Silhouette chairs are stackable. An IT area provided research facilities for the pupils; the wave fronted IT benching was 1000mm high to enable students to use it while sitting or standing. Two offices were built for staff use and the glass partitioning ensured there was

ample visibility throughout the sixth form common room from the offices. The sixth form refurbishment project was an outstanding success for the school as it not only provided additional capacity but increased student enrollment numbers due to the quality of their facilities.
