Immanuel College

The client appointed Pinnacle Furniture to refurbish the changing rooms and washrooms for their students as well as washrooms with showers for the staff.

The college had a set budget of £100,000, and the Design and Project Team had to review all the specification and costs to ensure that the project was kept within the budget. We installed duct panelling in SGL to cover the toilet cisterns and piping, and added button flush systems. The vanity unit panels were fitted using the same material, with mirrors and white splash backs to protect the wall from water damage. The benching in the changing rooms is constructed from 25mm welded rigid frames with recycled plastic seating slats in black.
