# Kensington Park School

Kensington Park School appointed Pinnacle Furniture to provide our FF&E Consultancy service and to refurbish the former Sixth Form College building, converting it into their Lower School for children aged 11-16.

In the science laboratories, Pinnacle installed units from the Capacity Storage range and fitted trough sinks, taps, gas taps and electrical power points. Some of the laboratories were narrow in places so we supplied slim trough sinks to maximise the available space. We supplied purple StorageWalls for the art rooms to house all of the art equipment and for the workstations, we added Postura Plus stools and Project tables. In the dining hall, we provided Feast tables in a raw metal finish and black Spectre chairs.
