Putney High School

Putney High School appointed Pinnacle Furniture to supply and install furniture for their temporary Science block which consisted of various areas including three Chemistry Laboratories.

The School also commissioned us to complete a legacy survey and manage the move from their existing building to the temporary block. Due to the construction of the building, the services could not be brought up through the floor so peninsular furniture had to be designed to bring services into each of the rooms. Pinnacle installed Capacity Storage units in graphite grey and added 25mm high pressure laminate worktops in a light grey finish. Services were integrated within the units such as gas taps, sinks and power.
