

Case Study: Brighton College

Pinnacle worked with McLaren Construction and architectural firm OMA to deliver a bespoke, high-spec project for Brighton College.

Brighton College required premium, practical designs and fitted furniture for 18 university standard science laboratories, prep rooms and kitchenette as well as other storage facilities for their new School of Science and Sport. From the brief, we worked towards achieving the best possible balance of the architect's vision and practicality of the School. In the science laboratories, we installed bespoke black 20mm SGL worktops, black fume cupboards, ceramic sinks and student and teacher islands.

Location:
Brighton, East Sussex
