Lady Eleanor Holles School

Pinnacle were commissioned by Lady Eleanor Holles School to design and refurbish an exciting food technology room to encourage their students to take an interest in cookery.

The School is situated in 24 acres of land and only 10 miles from Central London. The client required a new, cutting-edge food technology space for students and staff to work in. With health and safety being paramount to the design, we fitted non slip vinyl flooring and full height acrylic cladding. We also completed the refurbishment of all mechanical and electrical services. Bespoke teacherpod, food container units with undermounted steel sinks provided a clean and sleek effect.

Form stools for durability

Clustered group tables and stools

Non-slip vinyl flooring

Undermounted steel sinks

Trespa worktops with appliances installed

Gratnell tray storage units
