

Case Study: Richmond Upon Thames College

Working in collaboration with ISG and Atkins to supply creative and adaptable furniture to suit the College's vision for their brand-new building.

The furniture had to be flexible and durable for long term educational use and the design scheme needed to compliment the College's colours. The overall project needed to be completed to a tight schedule, so it was essential all our furniture samples were reviewed and signed off by the client within the time frame. A range of products were chosen including soft furnished sofas and modular systems, bright banquette dining tables and benches. We also supplied bespoke reception units, DT workbenches, food tech appliances and storage.
