# Weydon School

Pinnacle worked closely with Weydon School and the architect to complete their third major project for the third year running - two science laboratories and a prep room.

The Pinnacle Team were on site over the Summer holidays to ensure that the laboratories were ready for the student's return in September. The Capacity Storage units chosen for the laboratories were themed with purple doors and grey decor panels, which added colour to the classroom along with the EN high back chairs. The labs were modern and clean looking, with pale vinyl flooring and a grey Velstone worktop, which is resistant to chemicals and scratches, ensuring longevity for the school.

Grey Velstone worktops

Sinks, taps and bench mounted power

Fume cupboards were also supplied

Science Capacity Storage range

EN high-back chairs in purple and grey

Durable vinyl flooring
