

Case Study: St Dunstan's College

Pinnacle were asked by St Dunstan's College to provide FF&E Consultancy and Furniture for the New Build STEM Block, Sixth Form and Junior School. The Old Masters House was also repurposed as part of the Junior School provision.

The school's brief to us was to create a vibrant college for inspiring learning and collaboration with a flexible use of space. The college also wanted to be one of the region's leading STEM centres. Pinnacle worked directly with the school, alongside their architect Bond Bryan and Cathy Bagster Consulting at Stage 3 of the design. Pinnacle then worked with contractor, Wilmott Dixon during the consultancy stage.

Location:
Catford, London

Student No:
1,056

Duration:
9 weeks

Project Value:
£18m
