

Case Study: Watling Academy

Watling Academy is a £40m purpose-built secondary school that serves the Western Expansion Area (WEA) of Milton Keynes for 11–16-year-olds.

Pinnacle worked in collaboration with Glancy Nicholls Architects, Milton Keynes Council, and Graham Construction to develop an FF&E design solution for a new build secondary school, Watling Academy. We provided the fitted classroom furniture and specialist packages such as design technology equipment, fume cupboards, and bespoke joinery. The coronavirus pandemic presented obvious challenges during construction. However, the use of interactive visuals and VR facilitated the progress of this flagship project and worked well during our client engagement meetings.

Location:
Milton Keynes

Floor Area:
165,000 sq. ft

Student No:
1800

Project Value:
£40 million
